Projects

Predictive Medicine Recommendation System Using Machine Learning

- Developed a machine learning-based medicine recommendation system to predict diseases and suggest treatments from user symptoms, including data preprocessing, model training, and a user-friendly interface.
- Tools Used: Python, Machine Learning, scikit-learn, Flask, HTML, CSS, Pandas, NumPy

Staff leave Management System.

- This project involves creating web based leave management tool streamlines leave application, approval, and cancellation processes.
- Tools Used: Python, Django, SQLite, HTML, CSS, JavaScript

Expense Tracker Full MERN Stack

- Developed a secure MERN-stack Expense Tracker that provides comprehensive daily-to-yearly financial analytics through interactive data visualization and user profile management.
- Tools Used: React.js,Tailwind CSS,Node.js,Express.js,MongoDB

Technical Skills

Programming Languages: Python

Query Language: SQL

Web Development: HTML, CSS, JavaScript,React.js

Database: MongoDB

Tools: Git, GitHub
